CARREER OBJECTIVE

Premier Field Engineer at Microsoft

Available for overnight travel and communication

BACKGROUND

I am a Database Administrator with degree in Information Systems and Computing for Business and Commerce both by University of Franca. I have been working in large and mission critical (24 x 7) companies such as a Branch Pulp Manufacturer with head office in Finland, a Research Foundation of Federal University of Juiz de Fora – MG, and current working at a Bank head office with more than 600 bank branches.

I'm an experienced Database Administrator, with experience in High availability (deployment and maintenance) supporting critical environment since I started working with SQL Server.

EDUCATION

2004/Dez **Computing for Business and Commerce**

· UNIVERSITY OF FRANCA - UNIFRAN

2008/Dez **Information Systems**

· UNIVERSITY OF FRANCA - UNIFRAN

CERTIFICATION

- MCTS / MCITP SQL Server 2005
- MCTS / MCIPT SQL Server 2008
- MCT – Microsoft Certified Trainer 2012 – 2013
- MTAC – Microsoft Technology Audience Contributor since 2011
- MTA - Microsoft Technology Associate (Database Fundamentals)
- CCSQLA – Cambridge Certified SQL Associate
- TOEIC – Test Of English for International Communication

LANGUAGE SKILLS

PORTUGUESE

- Native language

ENGLISH

- Advanced skills (Learned with self-studying method)

TECHNICAL SKILLS

Deployment and Maintenance

- Experience in Stand Alone and Cluster aware installations.
- SQL Server and Service Packs Unattended installations.

Change Data Capture

- Experience in configuration, monitoring and troubleshooting about CDC, using its metadata and tables to identify and correct problems.

High Availability

- Knowledge about Windows Server Failover Cluster (WSFC), SQL Server Failover Cluster, Database Mirroring, SQL Server AlwaysOn, and how it works.

Backup / Restore and Disaster Recovery

- Deep knowledge about Disaster Recovery and Backup / Restore in SQL Server. Designing backup policies and Disaster Recovery Plans for each scenarios.

Troubleshooting

- It is important to keep calm and look for the best option to solve the incident as fast as possible. The environments I have worked with, brought me the needed experience about troubleshooting and problem solving.

Storage

- Basic and needed concepts about RAID types and its functionalities.

DMVs

- Using them to help in daily tasks, such as monitoring and getting information about system state.

General

- Involved and most time leading new projects along with DBA Team (Table Partitioning, Data Compression, CDC and soon). A good knowledge about Windows Server, Network, Storage and other areas related with Database Administration.

WORK EXPERIENCE

2012/03 - Current **Sicoob Confederação (Mirante Tecnologia) – (Brasília-DF)**

<http://www.sicoob.com.br/>

- Database Administrator for a 24 x 7 very critical environment.
- Geographical Contingence using SQL Server Failover Clustering along with Database Mirroring.
- Unattended installation for SQL Server Fail Over and its Service Packs.
- Maintenance of more than 800 SQL Server Databases distributed in about 25 SQL Server Instances (2000, 2005 e 2008R2)
- Migration of a large number of databases (about 100) in a short windows for downtime (about 1 hour)
- Meetings and proposals for use of best practices for developers and other IT professionals.

2011/08 - 2012/03 **FADEPE/UFJF - Research Foundation of Federal University of Juiz de fora (Belo Horizonte – MG)**

<http://www.fadepe.ufjf.br/>

- Worked as Database Administrator managing the whole environment.
- Review the entire solution of backup, writing a backup policy and deploying it to production environment.
- Deployment of an entire High Availability solution, using SQL Server Failover Cluster, being responsible for the whole process since configuration of Storage until the SQL Server installation and migration to the new infrastructure.
- Automation of several DBA daily tasks such as Job failure monitoring, and implementation of the best practices for the about mentioned activities.
- Reviewing of security issues, for example disabling all 'sa' logins in the instances and creating a personal login for each DBA.

2008/05 - 2011/08 **Veracel Celulose S/A – Eunápolis – BA**

www.veracel.com.br/

- Worked as Database Administrator, maintaining a pre-installed solution on Windows Server 2003 with SQL Server 2005 Failover Cluster.
- Managed about 18 SQL Server instances distributed in (DEV, QA and PRD).
- Deployment of improvements and standardization in the Database environment.
- Daily routine of a DBA, automating as much as possible these daily routines.

SOFT SKILLS

I consider myself a good professional, responsible, work well into a team, but also can do it independently. I like to study a lot and reading no-technical stuff for relaxing. Very communicative, trustworthy and friendly with customers and coworkers.

VOLUNTEER WORK

Virtual Pass PT

<http://www.virtualpass.com.br/>

- Co-Administrator of Virtual Pass PT – A Virtual SQL Server user group for all countries that have the Portuguese as main language.

SQL Server DF

SQL Server user group from Brasília-DF.

- Presented a session entitled: “High Availability with SQL Server 2012 – AlwaysOn Availability Groups”

SQL Server RS

SQL Server users group from Rio Grande do Sul and region

- Presented a virtual session entitled “Backup from the start to the end.

SQL Saturday 127 – Rio de Janeiro RJ

- Presented a session entitled “Backup and its importance in theory and practice”.
